How to use the Hong List

Refer to a person's name in Who's Who, which is followed by the firm's name.

The firm's name in the List of Hongs gives the business address and other information.

A person's name in the Residential Directory (Shanghai) is followed by the resident's private address.

In Shanghai a private address in the Street Directory gives the position of the house, the name of the street in Chinese, etc., which may be located on the map by reference to the District.

Special Attention is drawn to the Agency List, following the Shanghai Hongs. This contains over 2,000 agencies held by Shanghai firms. If you wish to find the agents for Remington Typewriters, Avery's Weighing Machines, etc., refer to this list, which will give you the local agent's name.

China Architects and Builders Compendium

An Indispensable Reference Volume

Nothing in Shanghai is changing more rapidly than its building. Its 1934 and 1923 sky lines might be those of different cities. With the increase in land values and the development of new styles of architecture to meet this situation, a book such as this Compendium is a positive necessity for all Builders, Contractors, Architects and Property Owners, and of great general interest to the renting public.

This latest edition brings all technical data concerned with every branch of building, architecture and property right up to the minute. It handles the material practically, clearly and from all angles—a book that saves its reader time and money.

THE NORTH-CHINA DAILY NEWS has for upwards of a century been recognised and quoted as the leading China foreign Newspaper. It has created for itself, and established for others, a model of what is required by readers and advertisers: a balance of news and opinion, a complete and impartial view of both Chinese and Foreign affairs, Financial surveys, Sport, Recreation and Literature.

Writers of several nationalities write on all subjects of national and popular interest and reviews of plays and cinemas appear regularly. The advertising appeals to the highest class of readers—and the wealthiest.

China Architects and Builders Compendium

An Indispensable Reference Volume

Nothing in Shanghai is changing more rapidly than its building. Its 1934 and 1923 sky lines might be those of different cities. With the increase in land values and the development of new styles of architecture to meet this situation, a book such as this Compendium is a positive necessity for all Builders, Contractors, Architects and Property Owners, and of great general interest to the renting public.

This latest edition brings all technical data concerned with every branch of building, architecture and property right up to the minute. It handles the material practically, clearly and from all angles—a book that saves its reader time and money.

China Architects and Builders Compendium

An Indispensable Reference Volume

Nothing in Shanghai is changing more rapidly than its building. Its 1934 and 1923 sky lines might be those of different cities. With the increase in land values and the development of new styles of architecture to meet this situation, a book such as this Compendium is a positive necessity for all Builders, Contractors, Architects and Property Owners, and of great general interest to the renting public.

This latest edition brings all technical data concerned with every branch of building, architecture and property right up to the minute. It handles the material practically, clearly and from all angles—a book that saves its reader time and money.

China Architects and Builders Compendium

An Indispensable Reference Volume

Nothing in Shanghai is changing more rapidly than its building. Its 1934 and 1923 sky lines might be those of different cities. With the increase in land values and the development of new styles of architecture to meet this situation, a book such as this Compendium is a positive necessity for all Builders, Contractors, Architects and Property Owners, and of great general interest to the renting public.

This latest edition brings all technical data concerned with every branch of building, architecture and property right up to the minute. It handles the material practically, clearly and from all angles—a book that saves its reader time and money.

THE NORTH-CHINA DAILY NEWS

A newspaper seven days a week, with an illustrated supplement every Sunday printed on art paper.

THE NORTH-CHINA DAILY NEWS has for upwards of a century been recognised and quoted as the leading China foreign Newspaper. It has created for itself, and established for others, a model of what is required by readers and advertisers: a balance of news and opinion, a complete and impartial view of both Chinese and Foreign affairs, Financial surveys, Sport, Recreation and Literature.

Writers of several nationalities write on all subjects of national and popular interest and reviews of plays and cinemas appear regularly. The advertising appeals to the highest class of readers—and the wealthiest.

An Indispensable Reference Volume

Nothing in Shanghai is changing more rapidly than its building. Its 1935 and 1923 sky lines might be those of different cities. With the increase in land values and the development of new styles of architecture to meet this situation, a book such as this Compendium is a positive necessity for all Builders, Contractors, Architects and Property Owners, and of great general interest to the renting public.

The latest edition brings all technical data concerned with every branch of building, architecture and property right up to the minute. It handles the material practically, clearly and from all angles—a book that saves its reader time and money.
